COVER LETTER

Please accept my resume as an expressed interest in exploring the possibilities of joining your department and organization in a software engineering position.

My work history has provided me a variety of business skills which allow me to relate to all levels of management, to a variety of business positions, and work successfully with a diversity of personalities, customers, and end-users.

My work experience has provided me with a variety of information systems knowledge and practical skills; primarily in software engineering, full stack development, implementation, and administration, relational database architecture, SQL Server query development, and database management. I also have proficient skills with website design, HTML, CSS, and JavaScript development, as well as website administration.

I consider myself to be a results-oriented, dependable, and team player; who is not easily affected by job stress, and will be a strong asset to your department and organization in a variety of duties. I am certainly receptive to any company training and I am a fast learner in any on the job training situation, if required.

I look forward to a personal interview at your convenience.

OBJECTIVE

A highly motivated developer with the ability to deliver by understanding the needs of clients while meeting proposed deadlines in an efficient manner. To continue to advance my career within an outstanding corporation where I will be able to utilize my skills, experience and creativity.

Seeking a career in Software Engineering / Web Development environment that will continually challenge my problem solving and analytical skills across a broad spectrum of technologies.

Looking for opportunities around Southern New Hampshire Area, USA.
